

A scatter plot showing the relationship between 'Degree' (x-axis) and an unlabeled y-axis. The x-axis is on a logarithmic scale, ranging from 10^0 to 10^4 . The y-axis is also on a logarithmic scale, with major ticks at 10^0 , 10^1 , 10^2 , and 10^3 . The data points are blue dots. There is a clear downward trend for low degrees, with a sharp drop-off as degree increases. A dense cluster of points is visible between degrees 10 and 100, where the y-values are mostly between 10^0 and 10^1 . A few isolated points are scattered at higher degrees, up to approximately 10^4 .
